

## BT7025 - HORIZONTAL POLE ADAPTOR

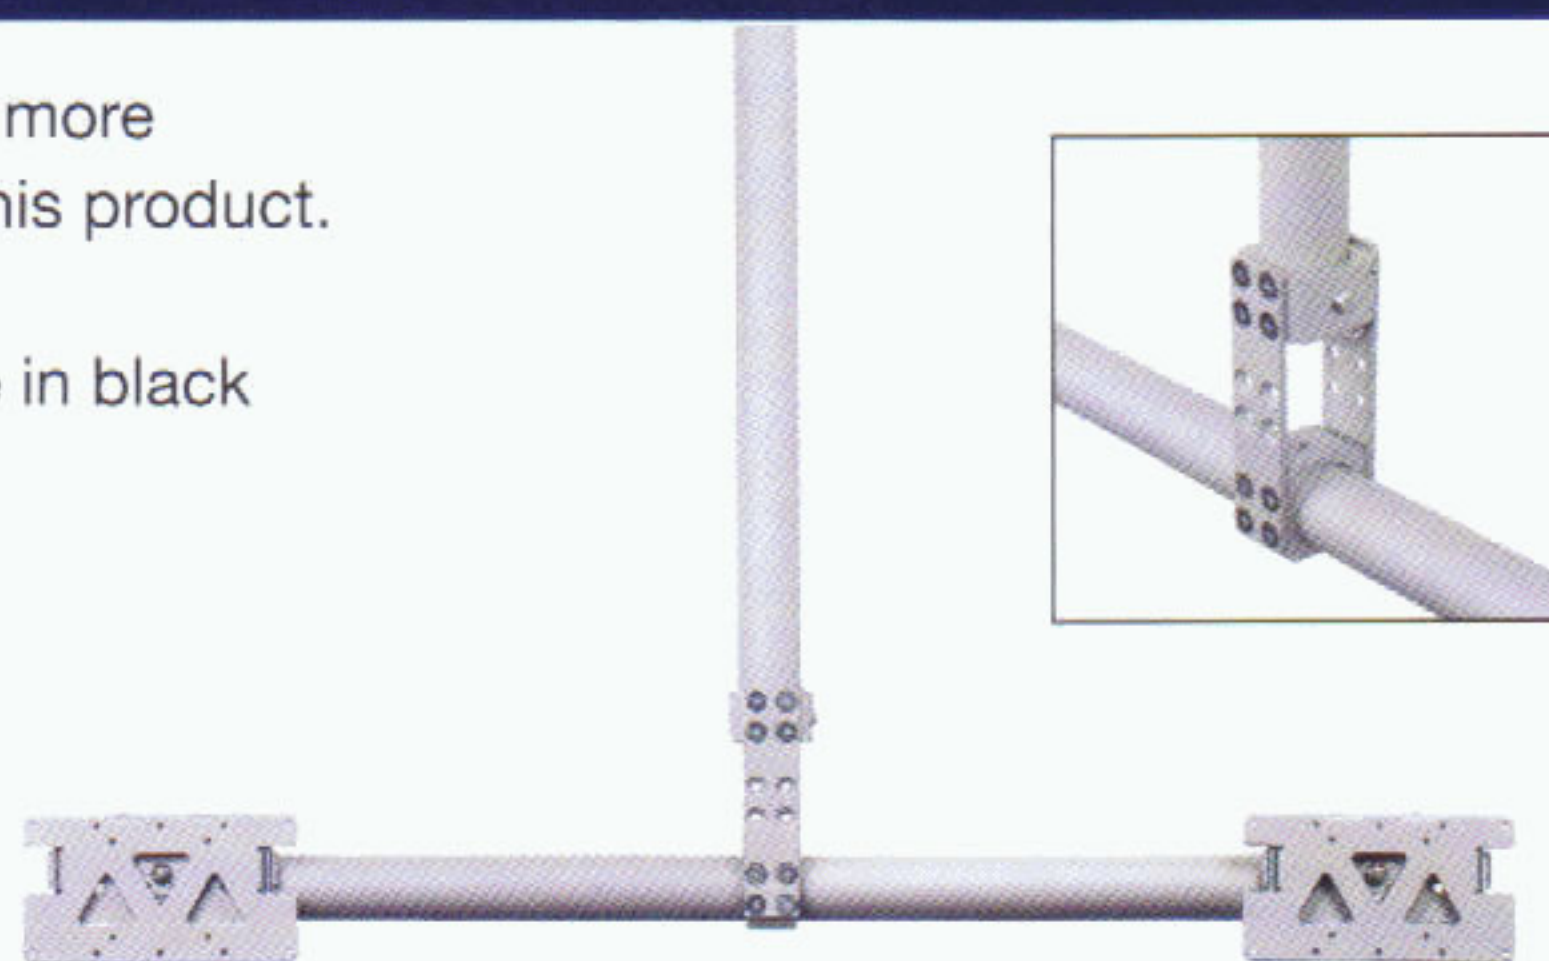

The new BT7025 allows poles to be mounted horizontally across fixed vertical poles.

Suitable for use with both 50mm and 60mm diameter poles, the BT7025 allows for a wide range of mounting structures to be created.

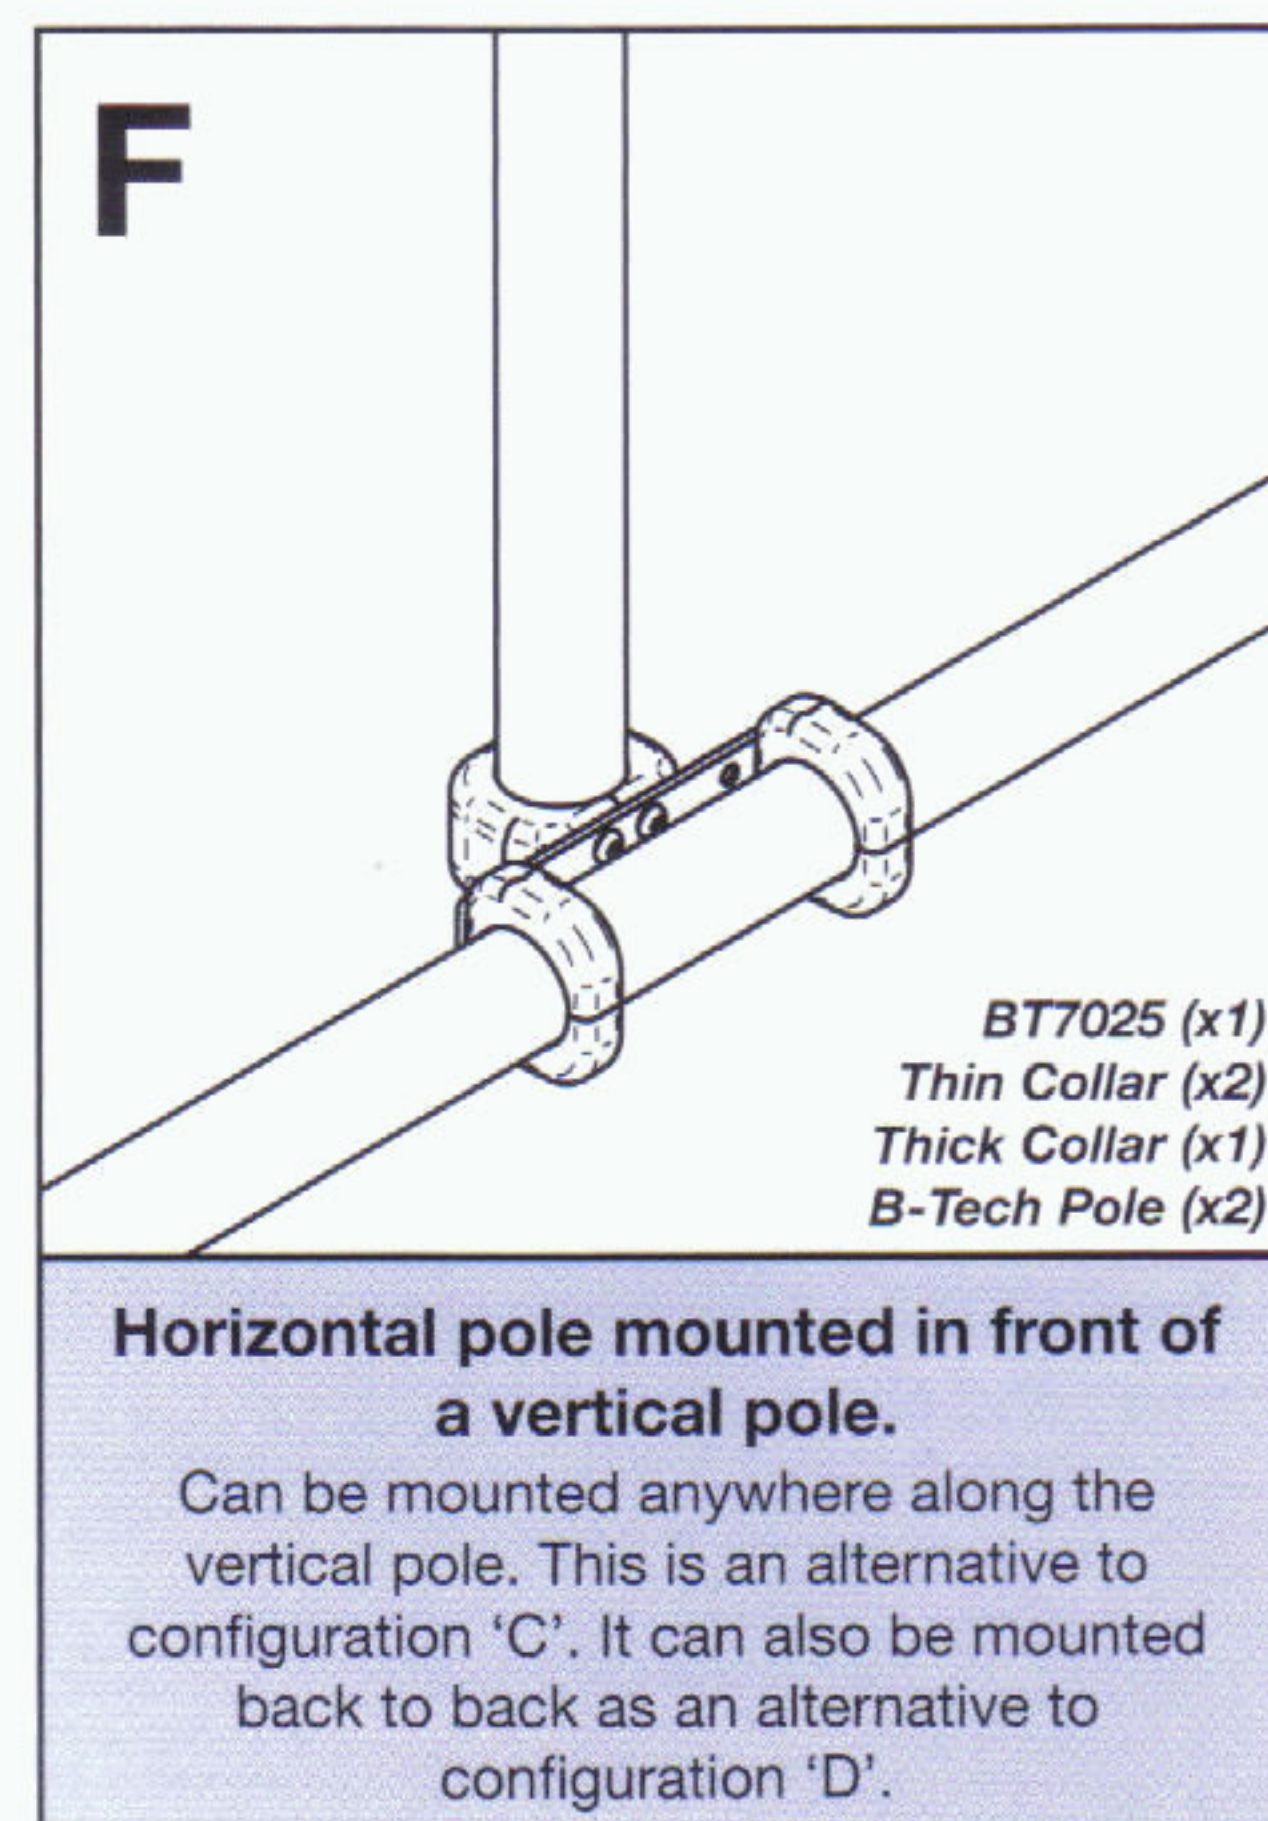

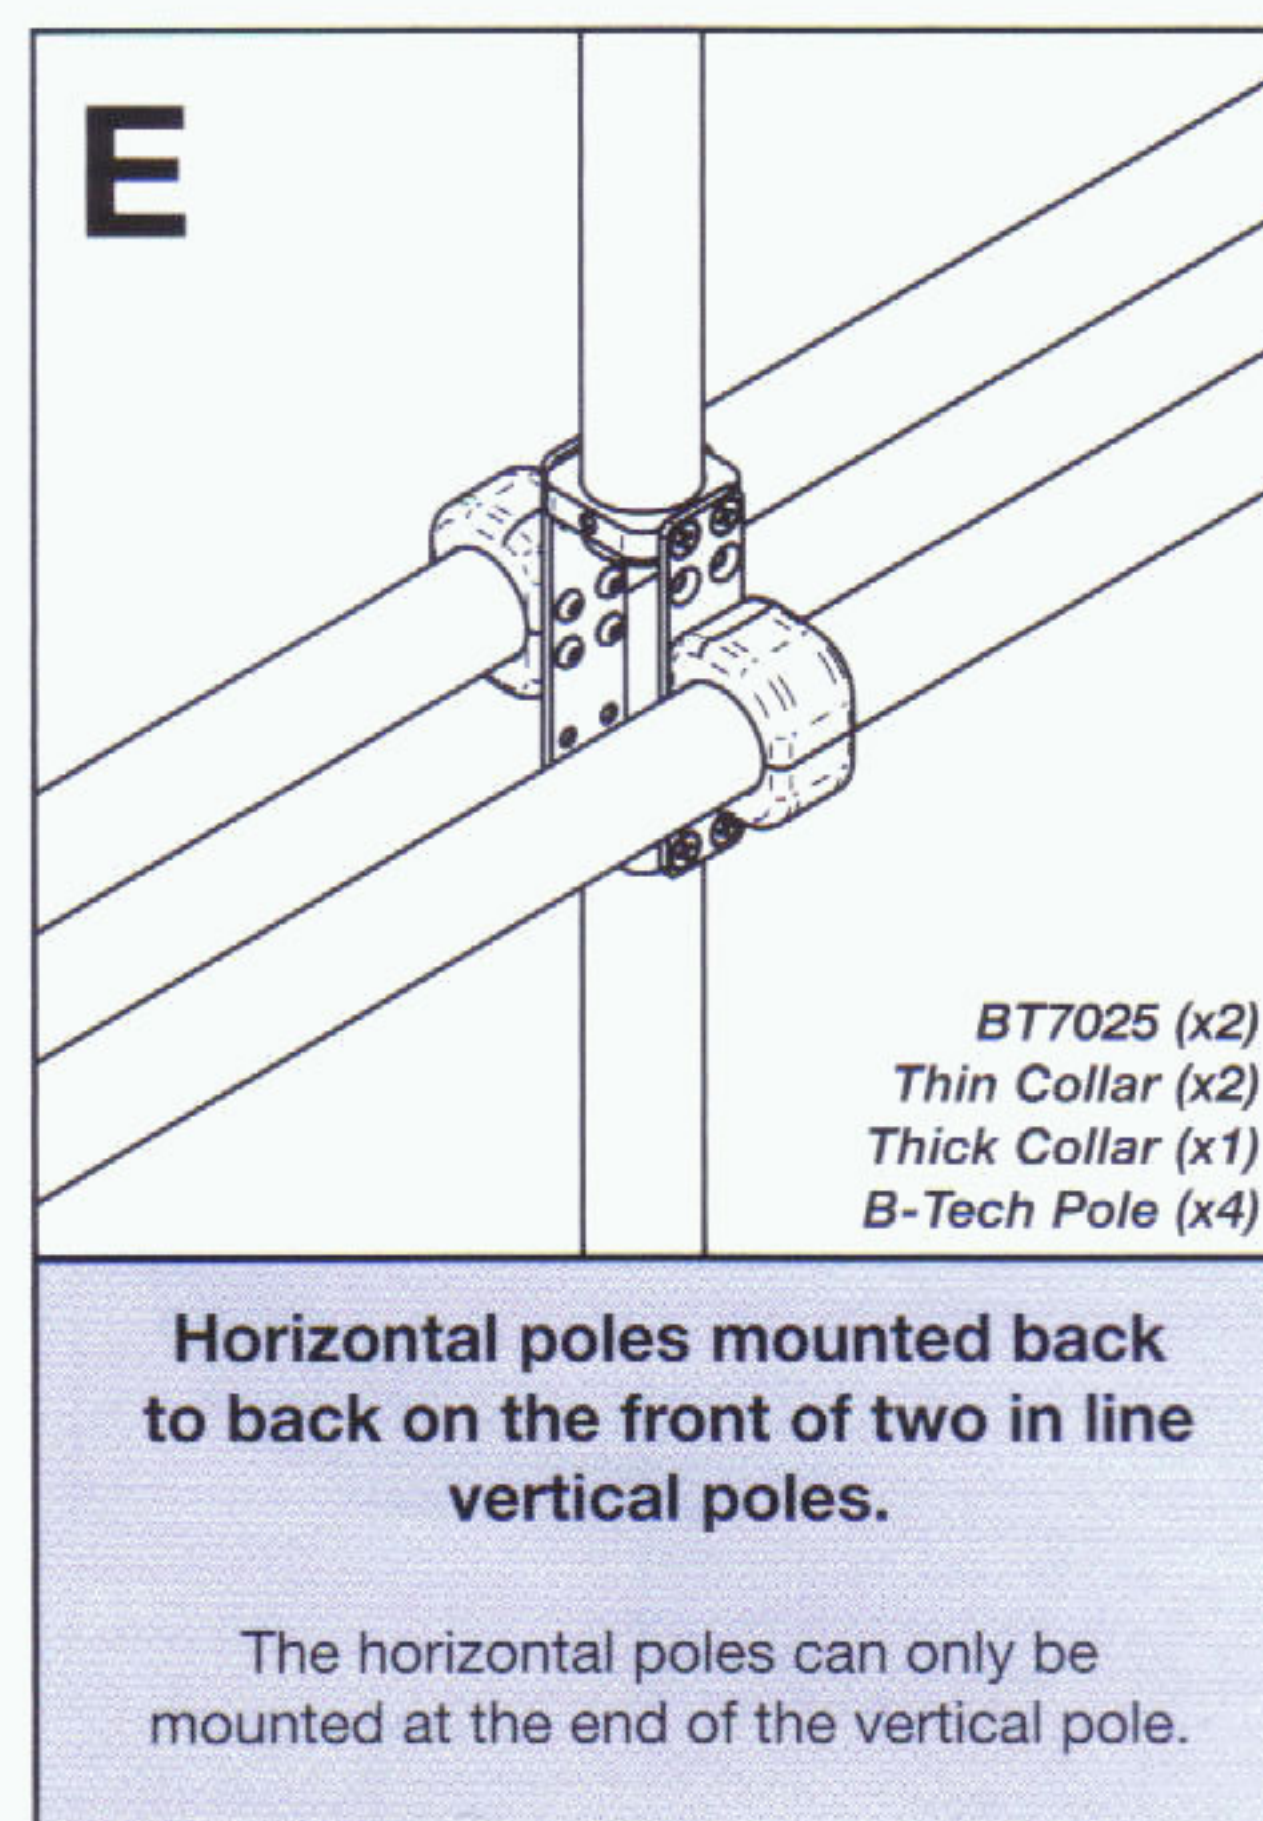

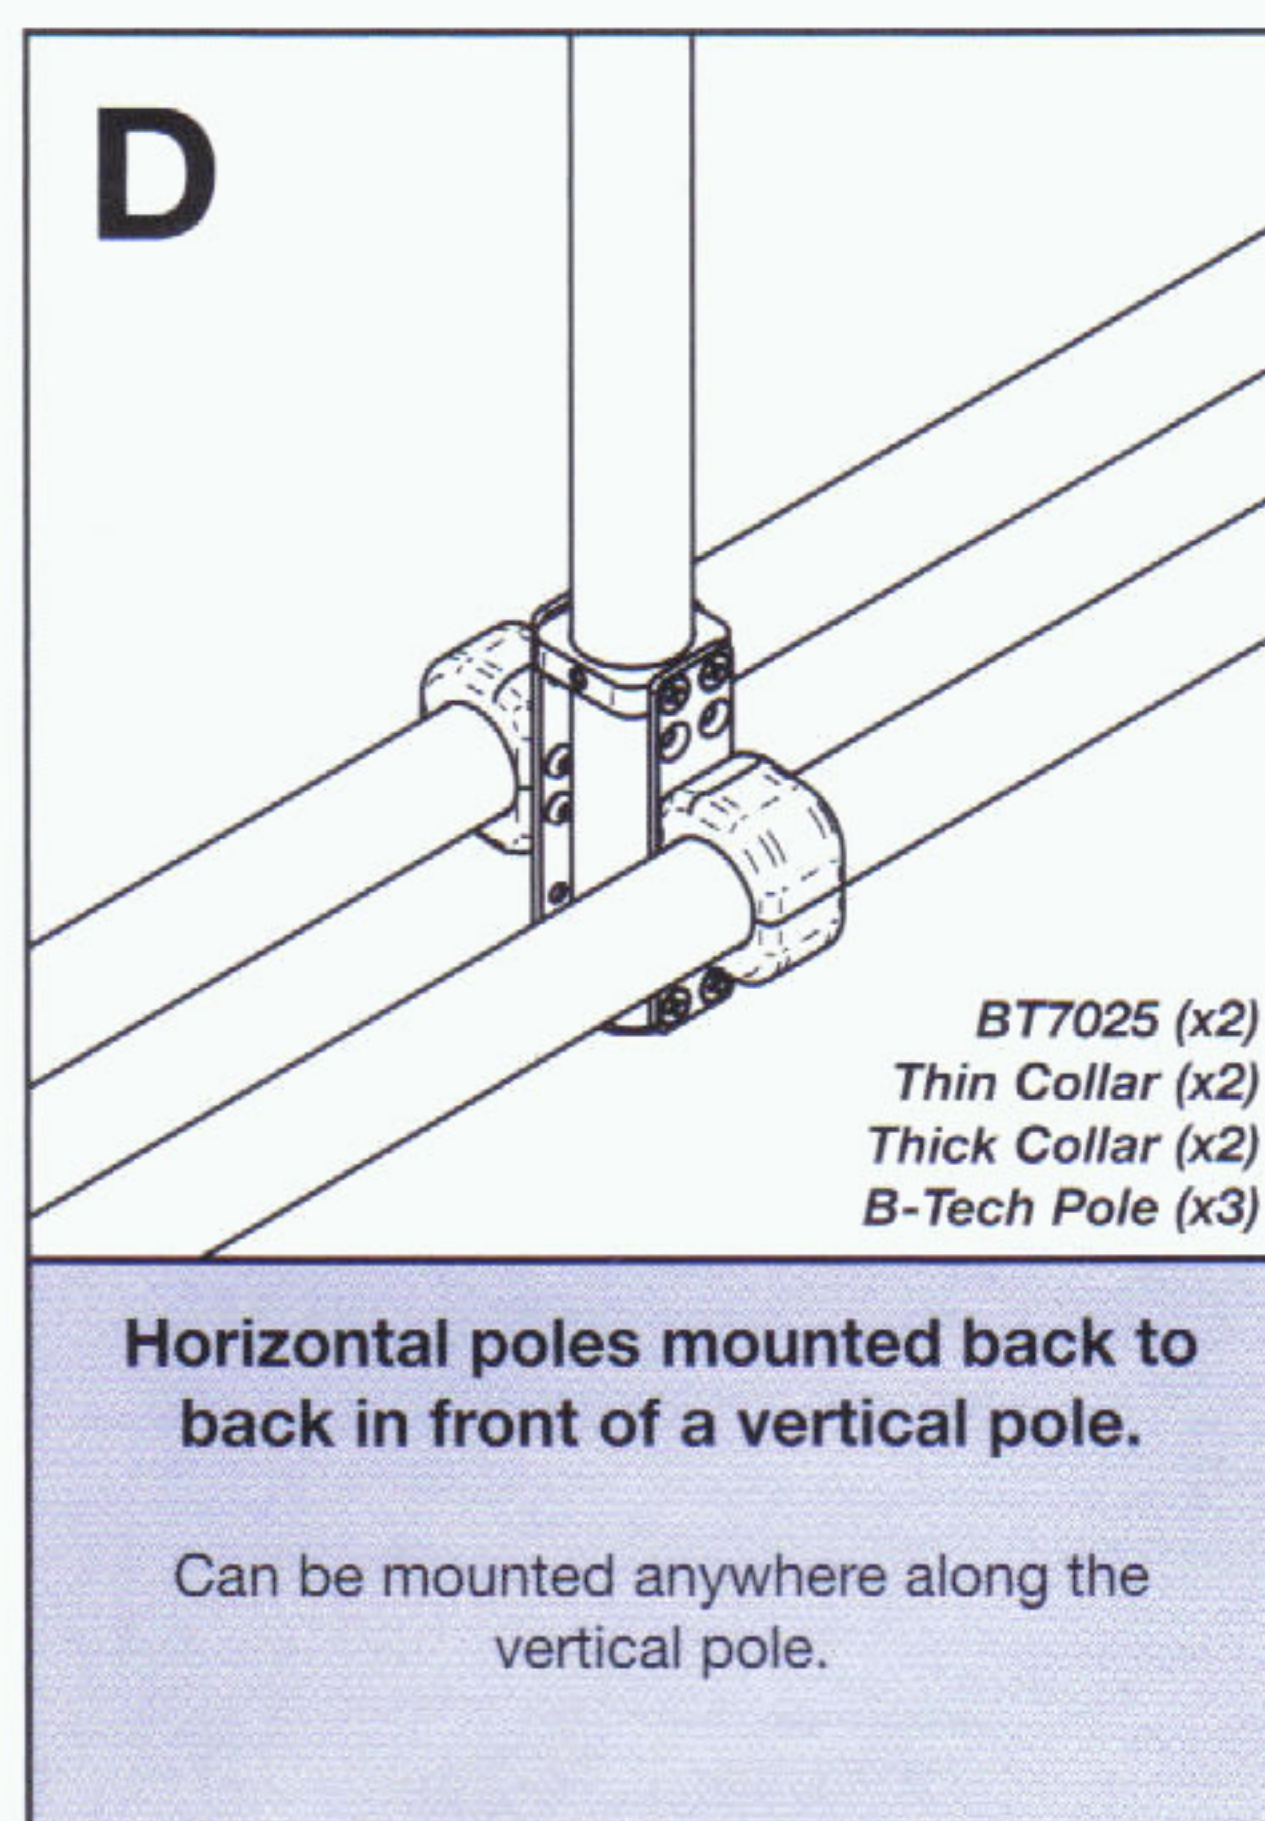

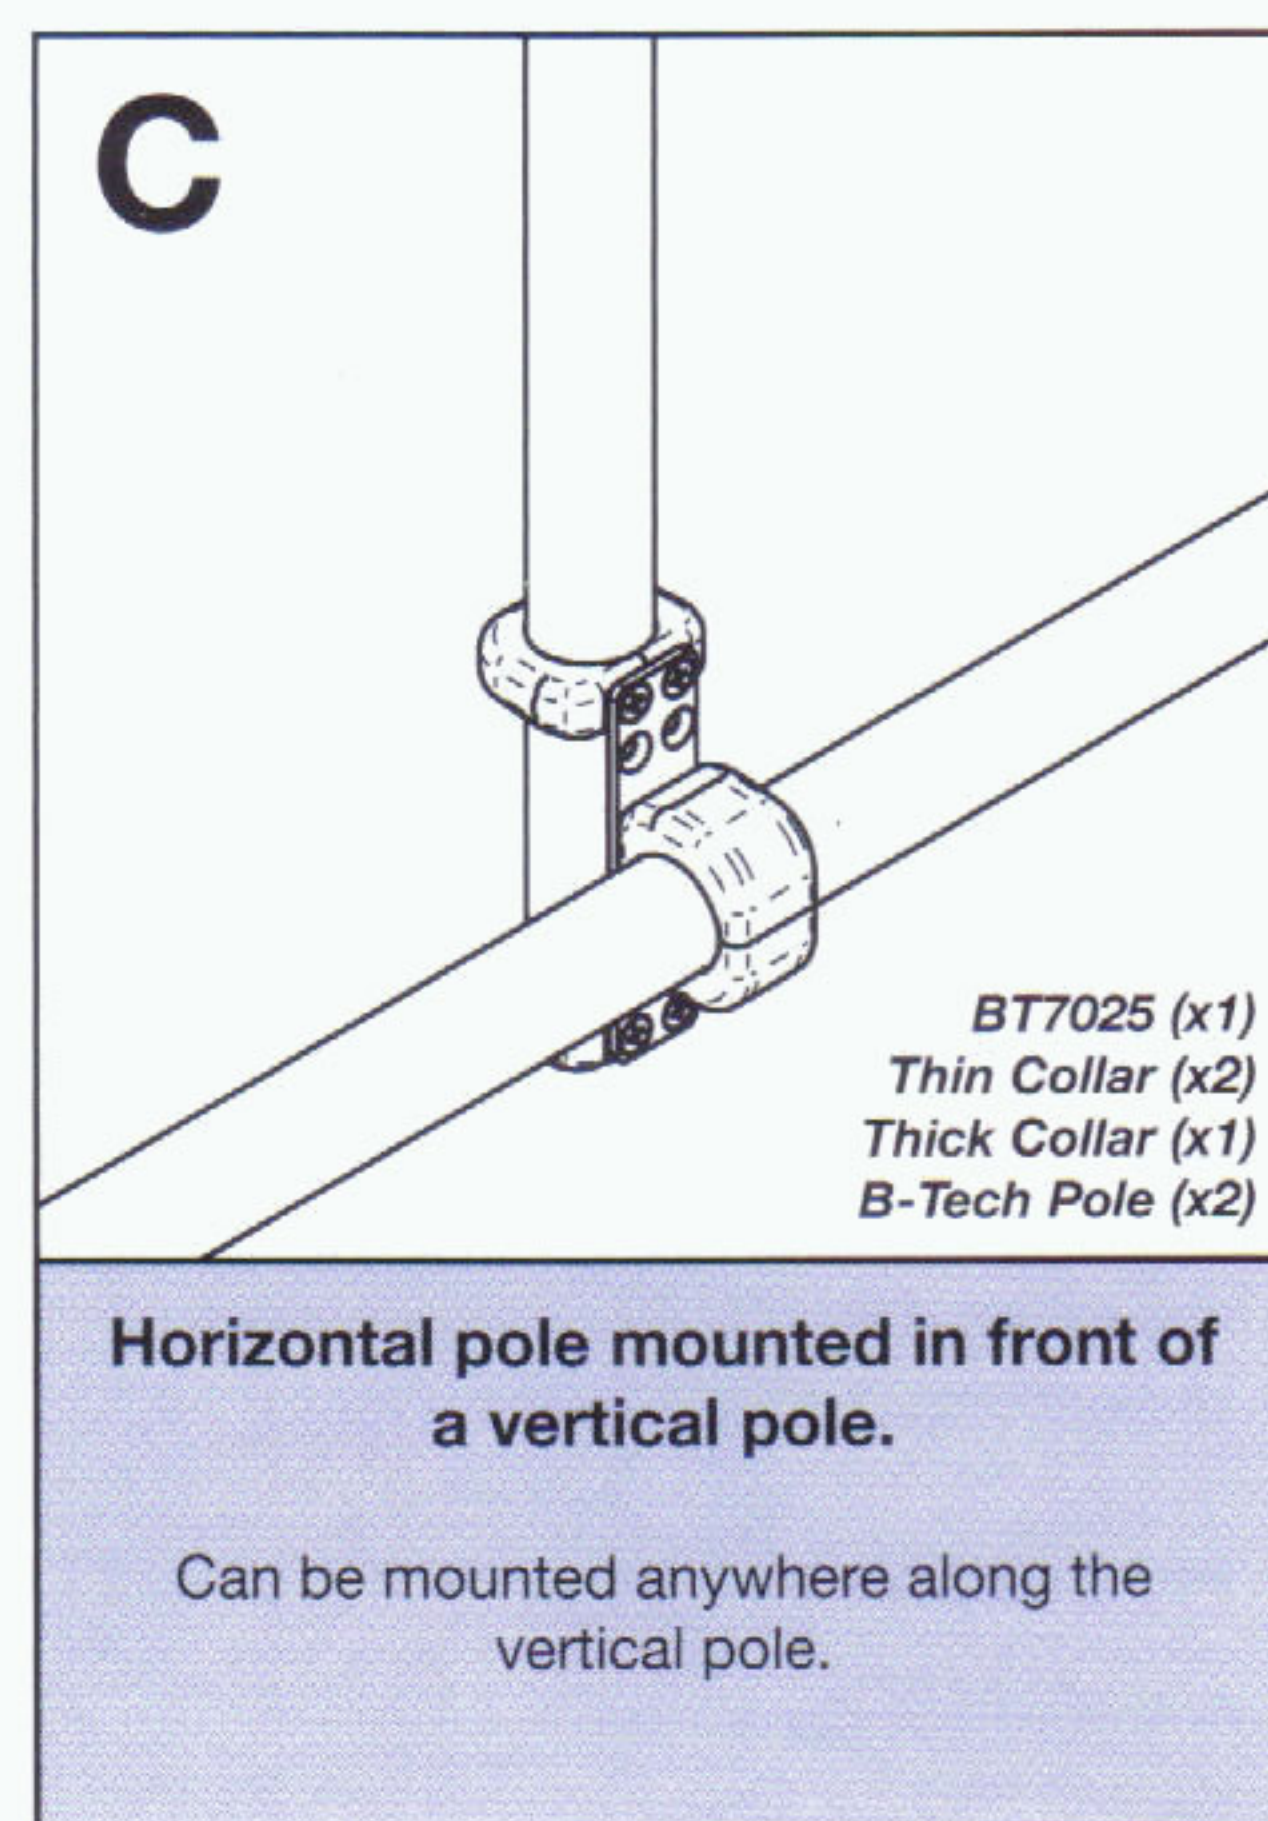

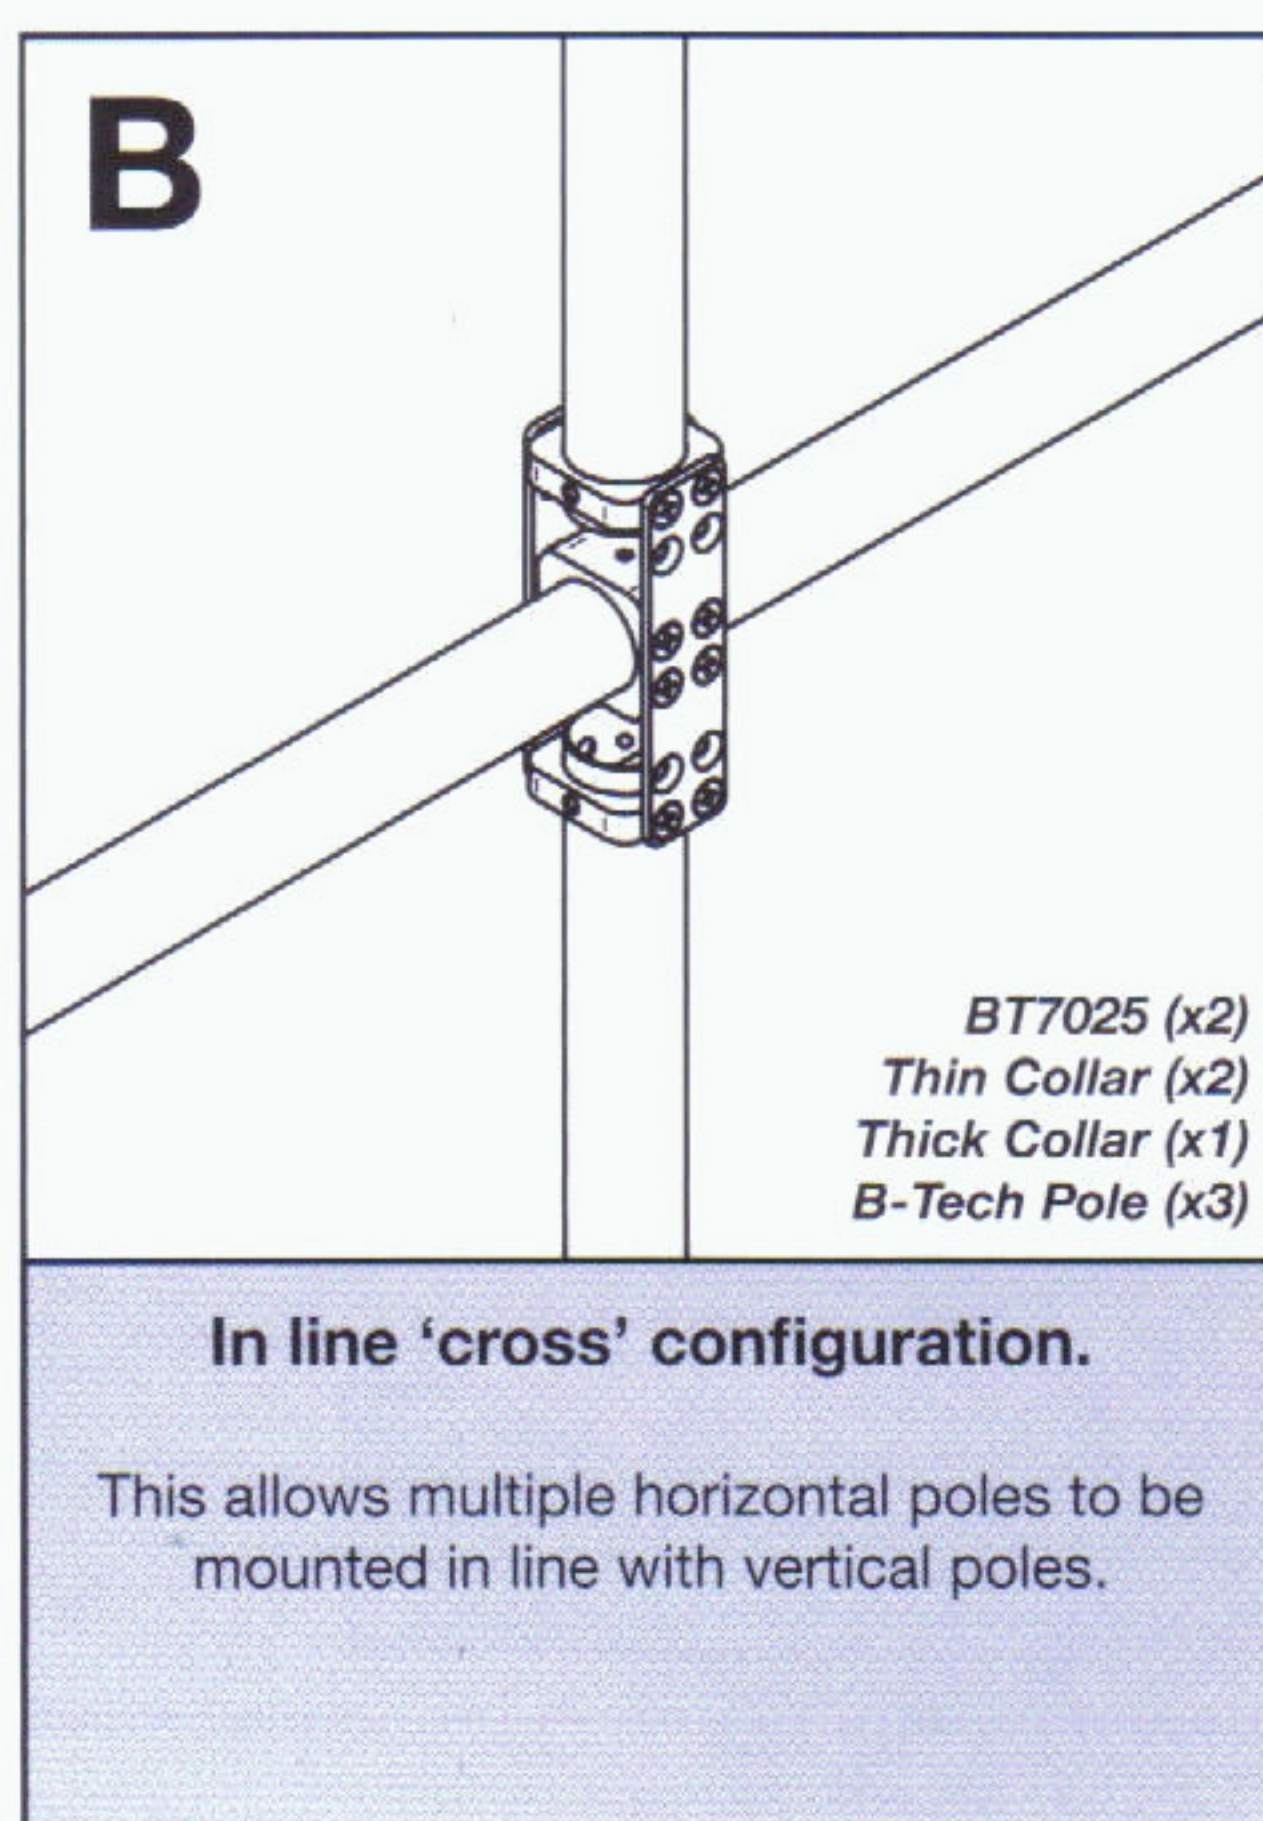

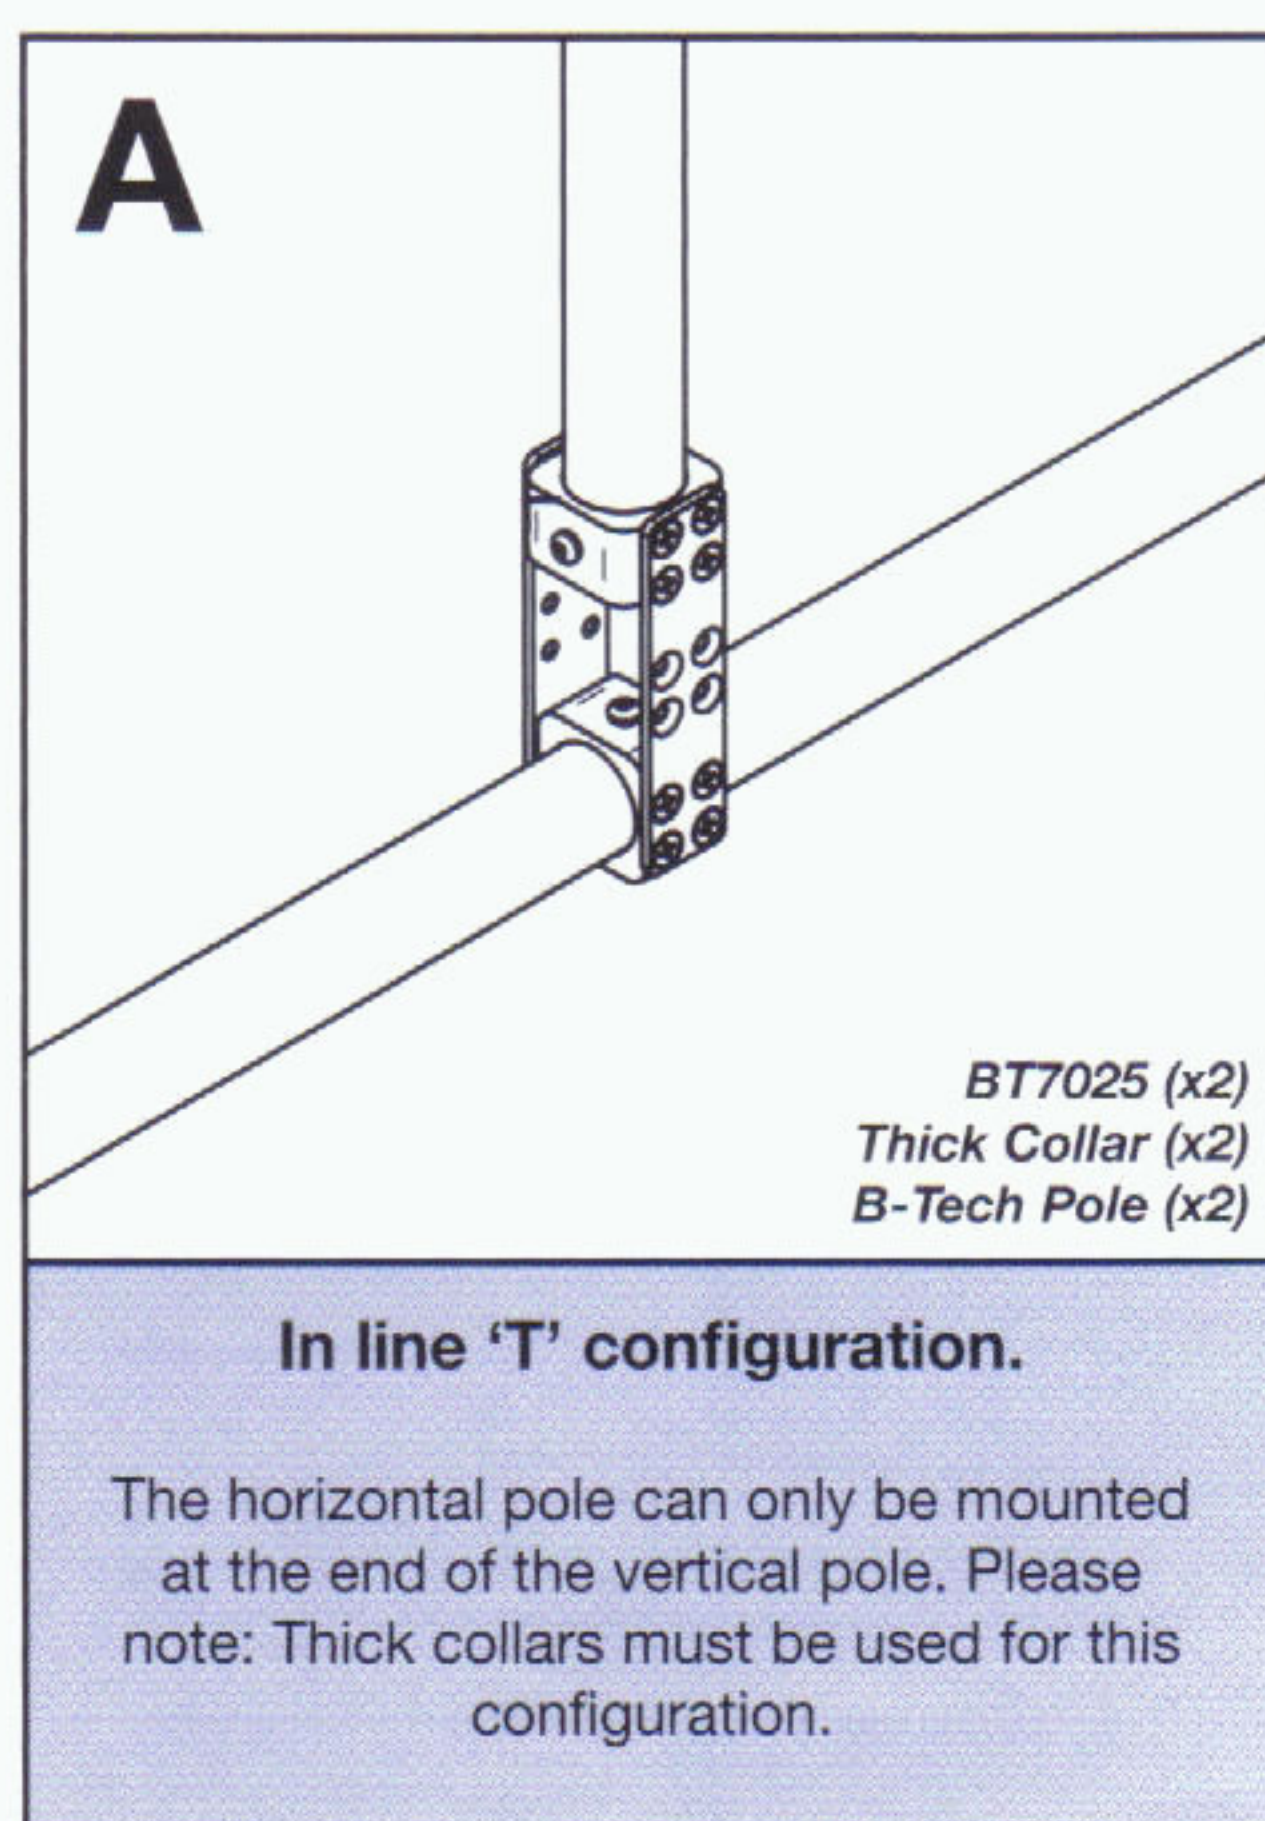

Examples of BT7025 installations and configurations are shown over these

2 pages, but there are many more mounting possibilities with this product.

The BT7025 is now available in black and silver.

## BT7025 TYPICAL CONFIGURATIONS

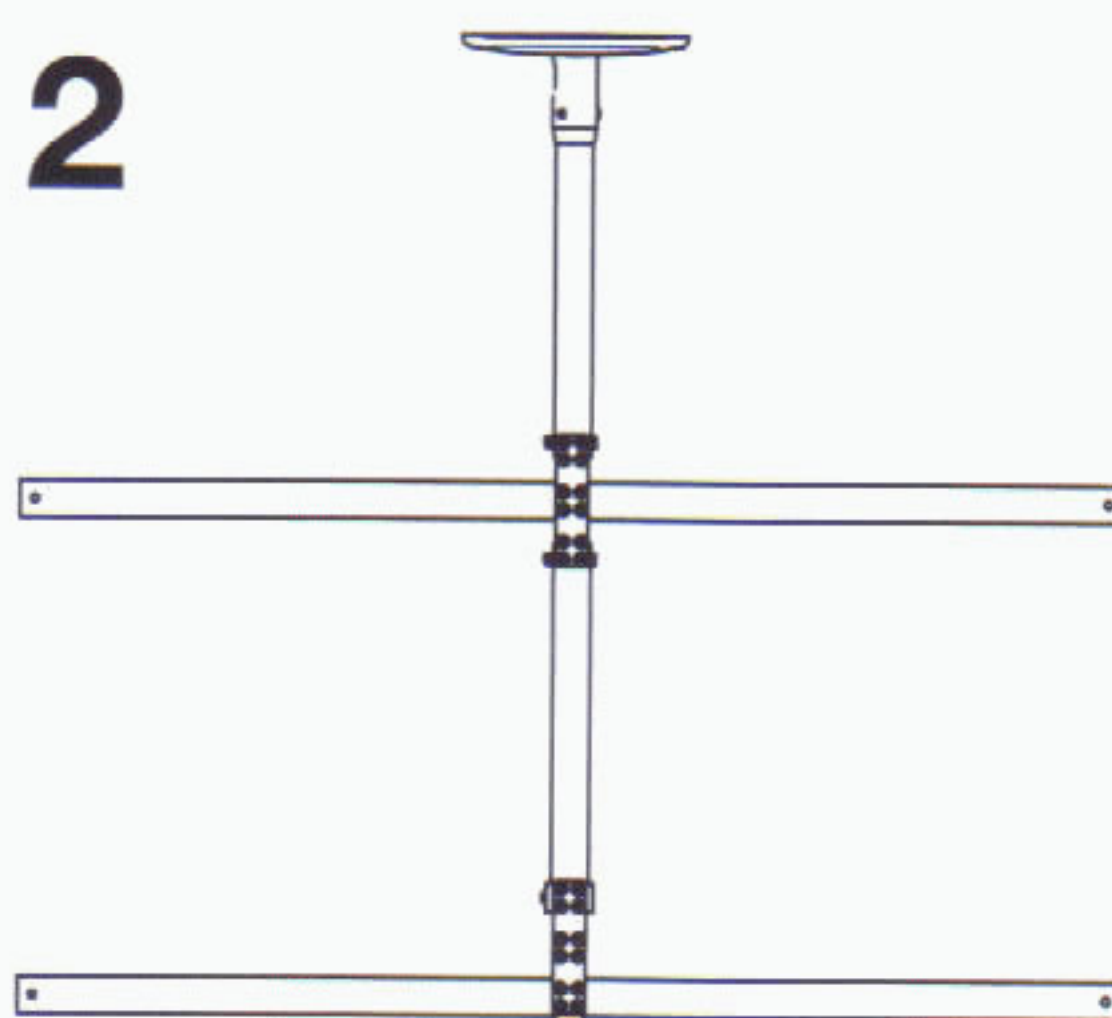

## BT7025 EXAMPLE INSTALLATIONS

1

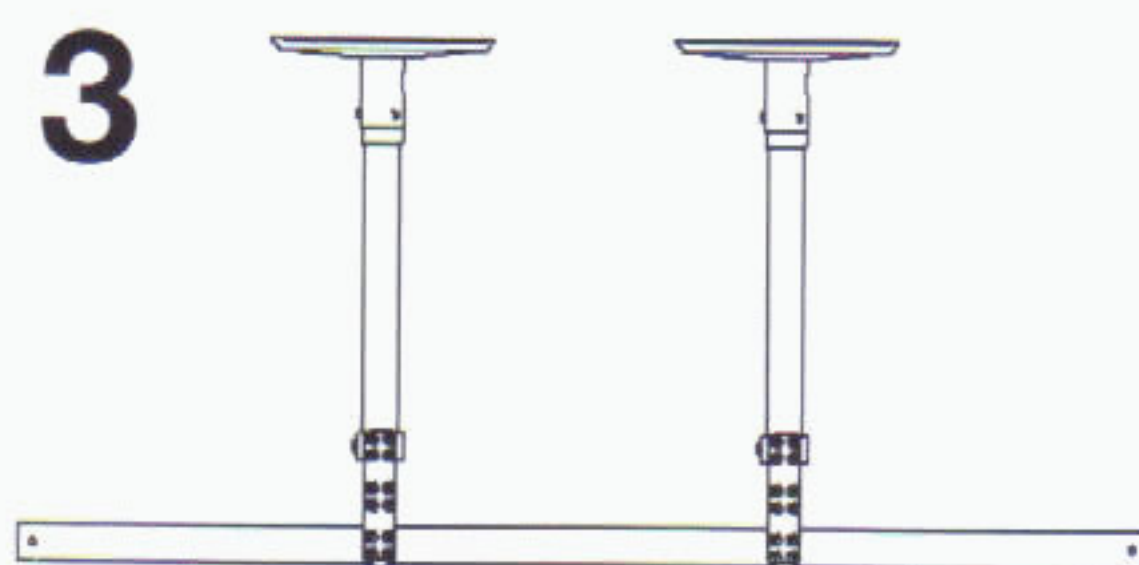

In line 'T' configuration.

2

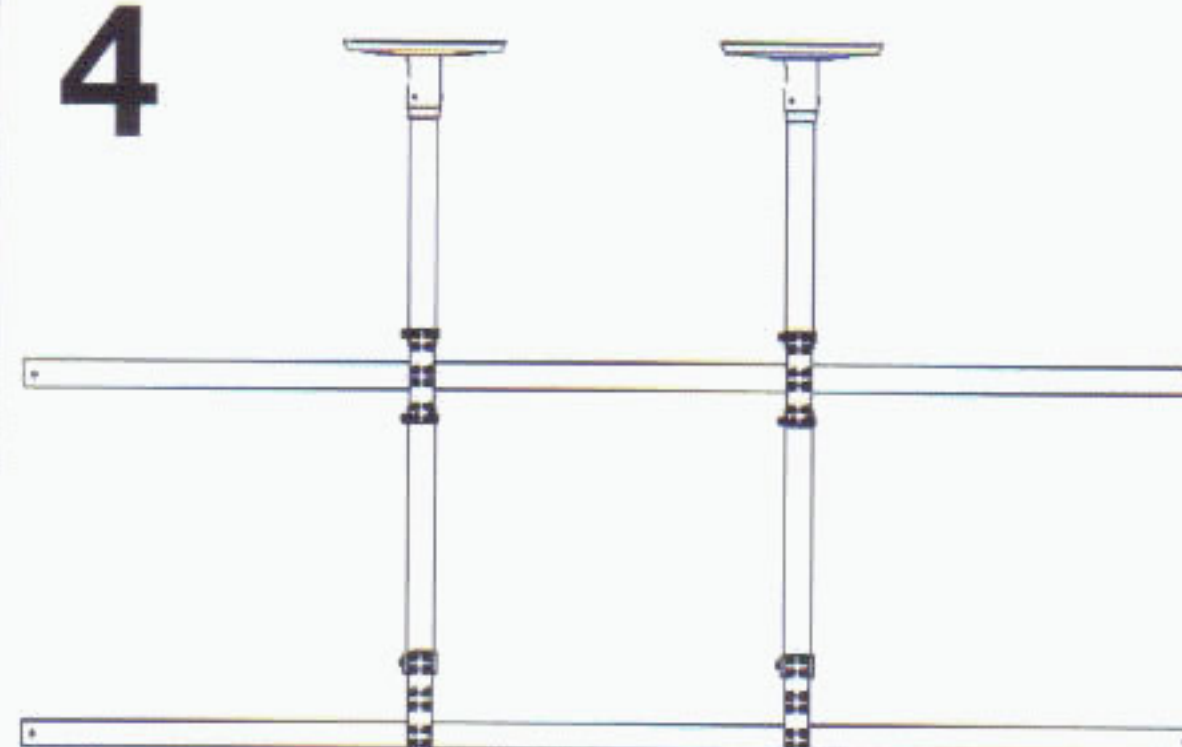

In line 'cross' configuration.

3

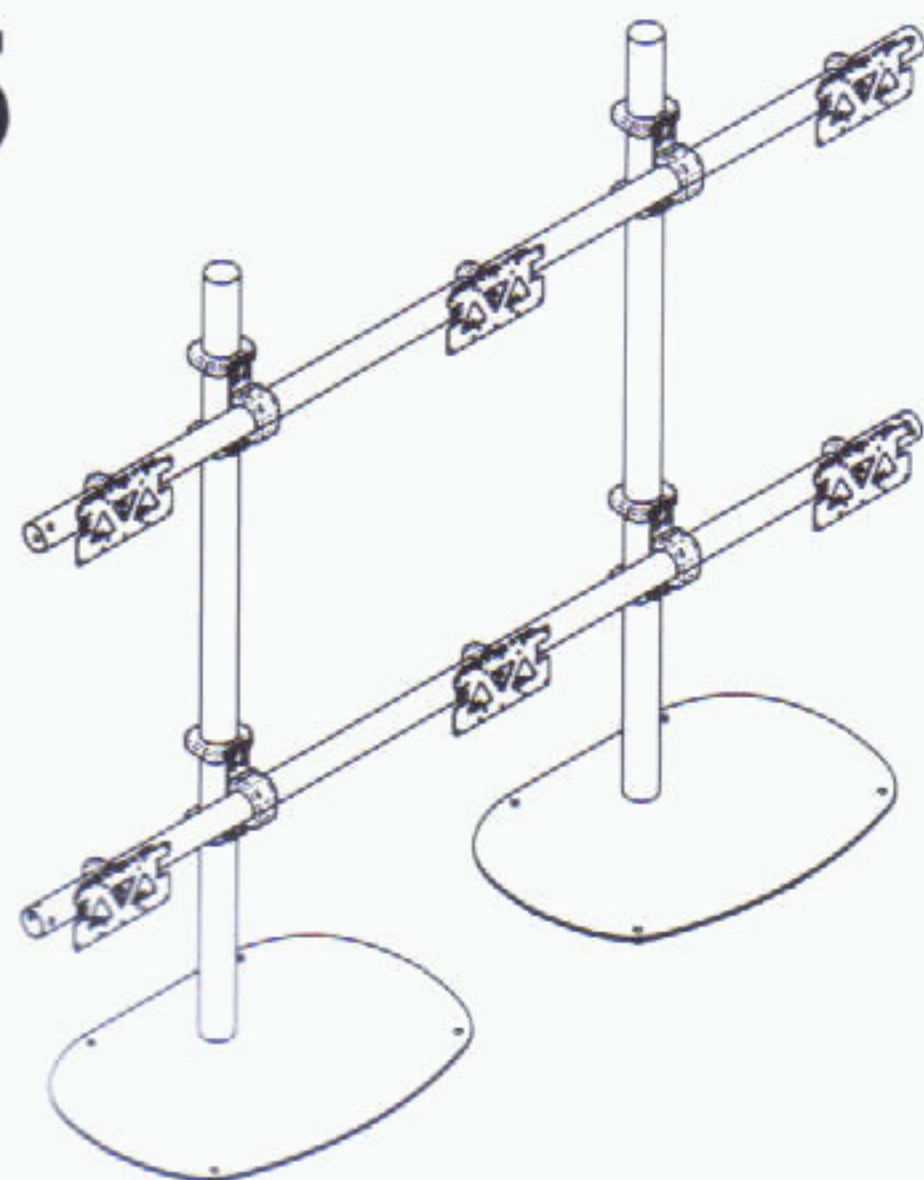

Dual pole, in line 'T' configuration.

4

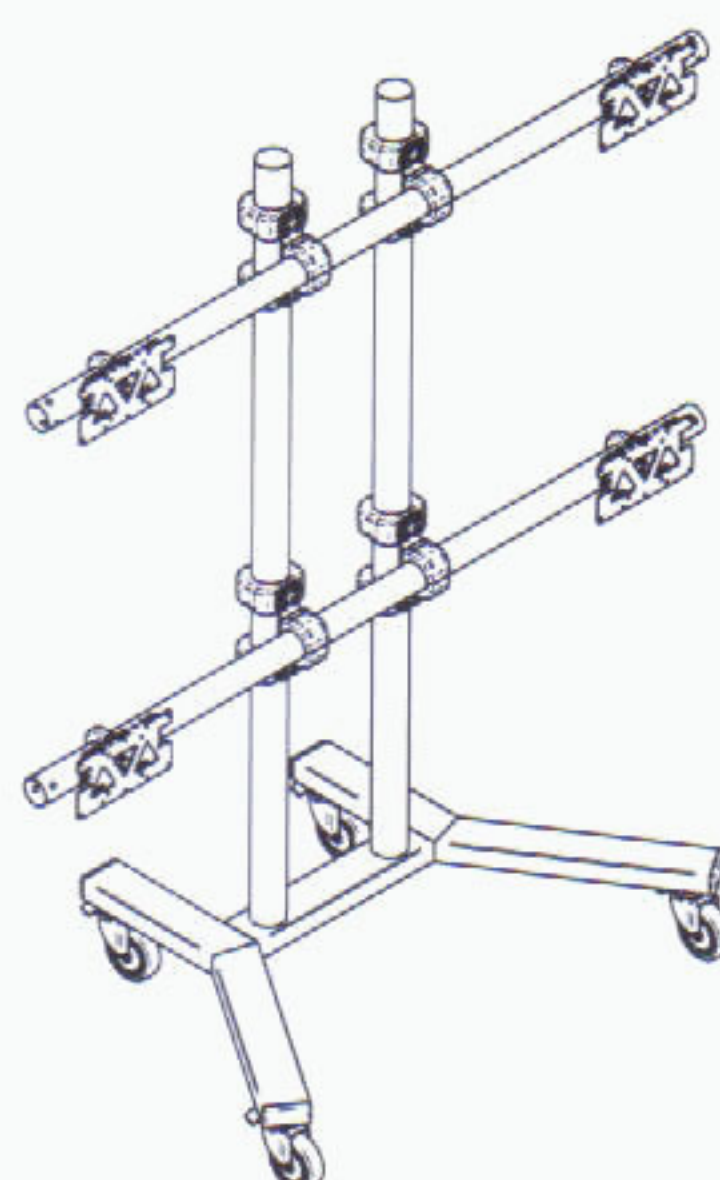

Dual pole, in line 'cross' configuration.

5

Multi screen floor stand installation.

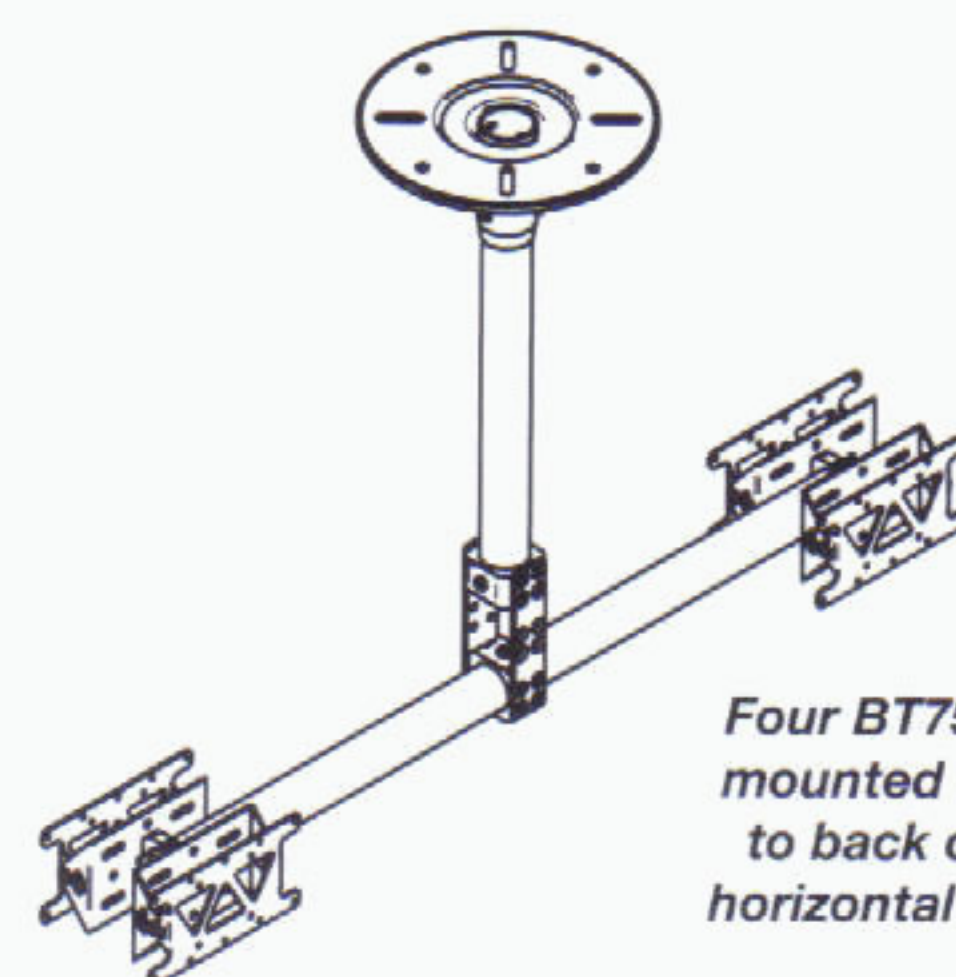

6

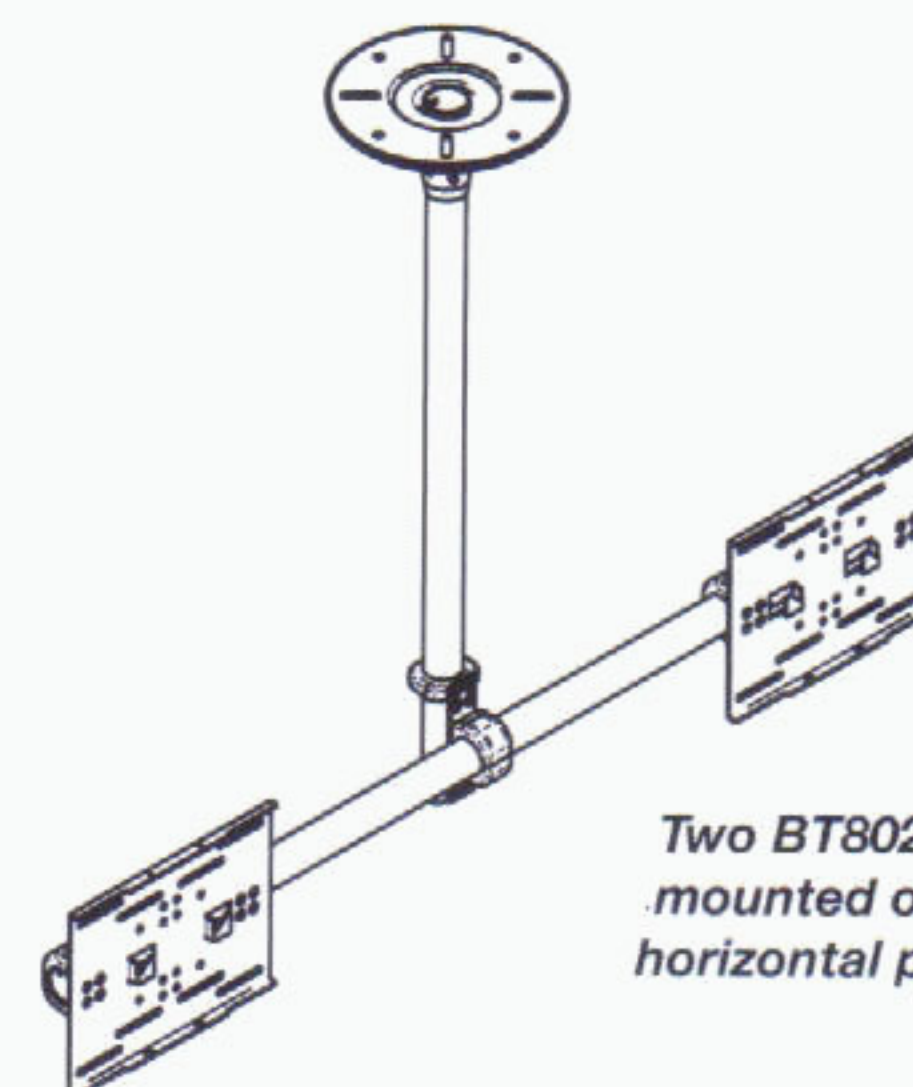

Multi screen trolley installation.

**WARNING:** The recommended weight limit of the BT7025 is 140Kg (70Kg each side of the BT7025). Individual weight limits of attached and supporting mounts must not be exceeded. As B-Tech has no control over how this product is used, it is important that installers ensure the structure is strong enough before attaching AV equipment and that the structure is counterbalanced at both ends of all horizontal poles. B-Tech accept no liability for loss or damage caused by improper installation or mounting on unstable structures.

## ATTACHING MOUNTS

Four BT7522's mounted back to back on a horizontal pole.

Two BT8026's mounted on a horizontal pole.

### Attaching mounts to a pole structure.

Any collar compatible B-Tech mount (indicated in the new mounts catalogue with the symbol shown below), can be attached to a pole structure created with the BT7025. Examples of 2 typical installations are shown above.

## COLLARS

	Thin Collar	Thick Collar
50mm (2")	BT7052 	BT7051 
60mm	BT7260 	BT7060 

### Selecting the right collar.

These example configurations use the B-Tech 50mm System 2 range of poles and collars. It is however possible to also use the BT7025 in conjunction with the 60mm professional range of B-Tech mounts.

Thick collars can be used where thin collars are shown but collar covers cannot always be used (depending on configuration).
